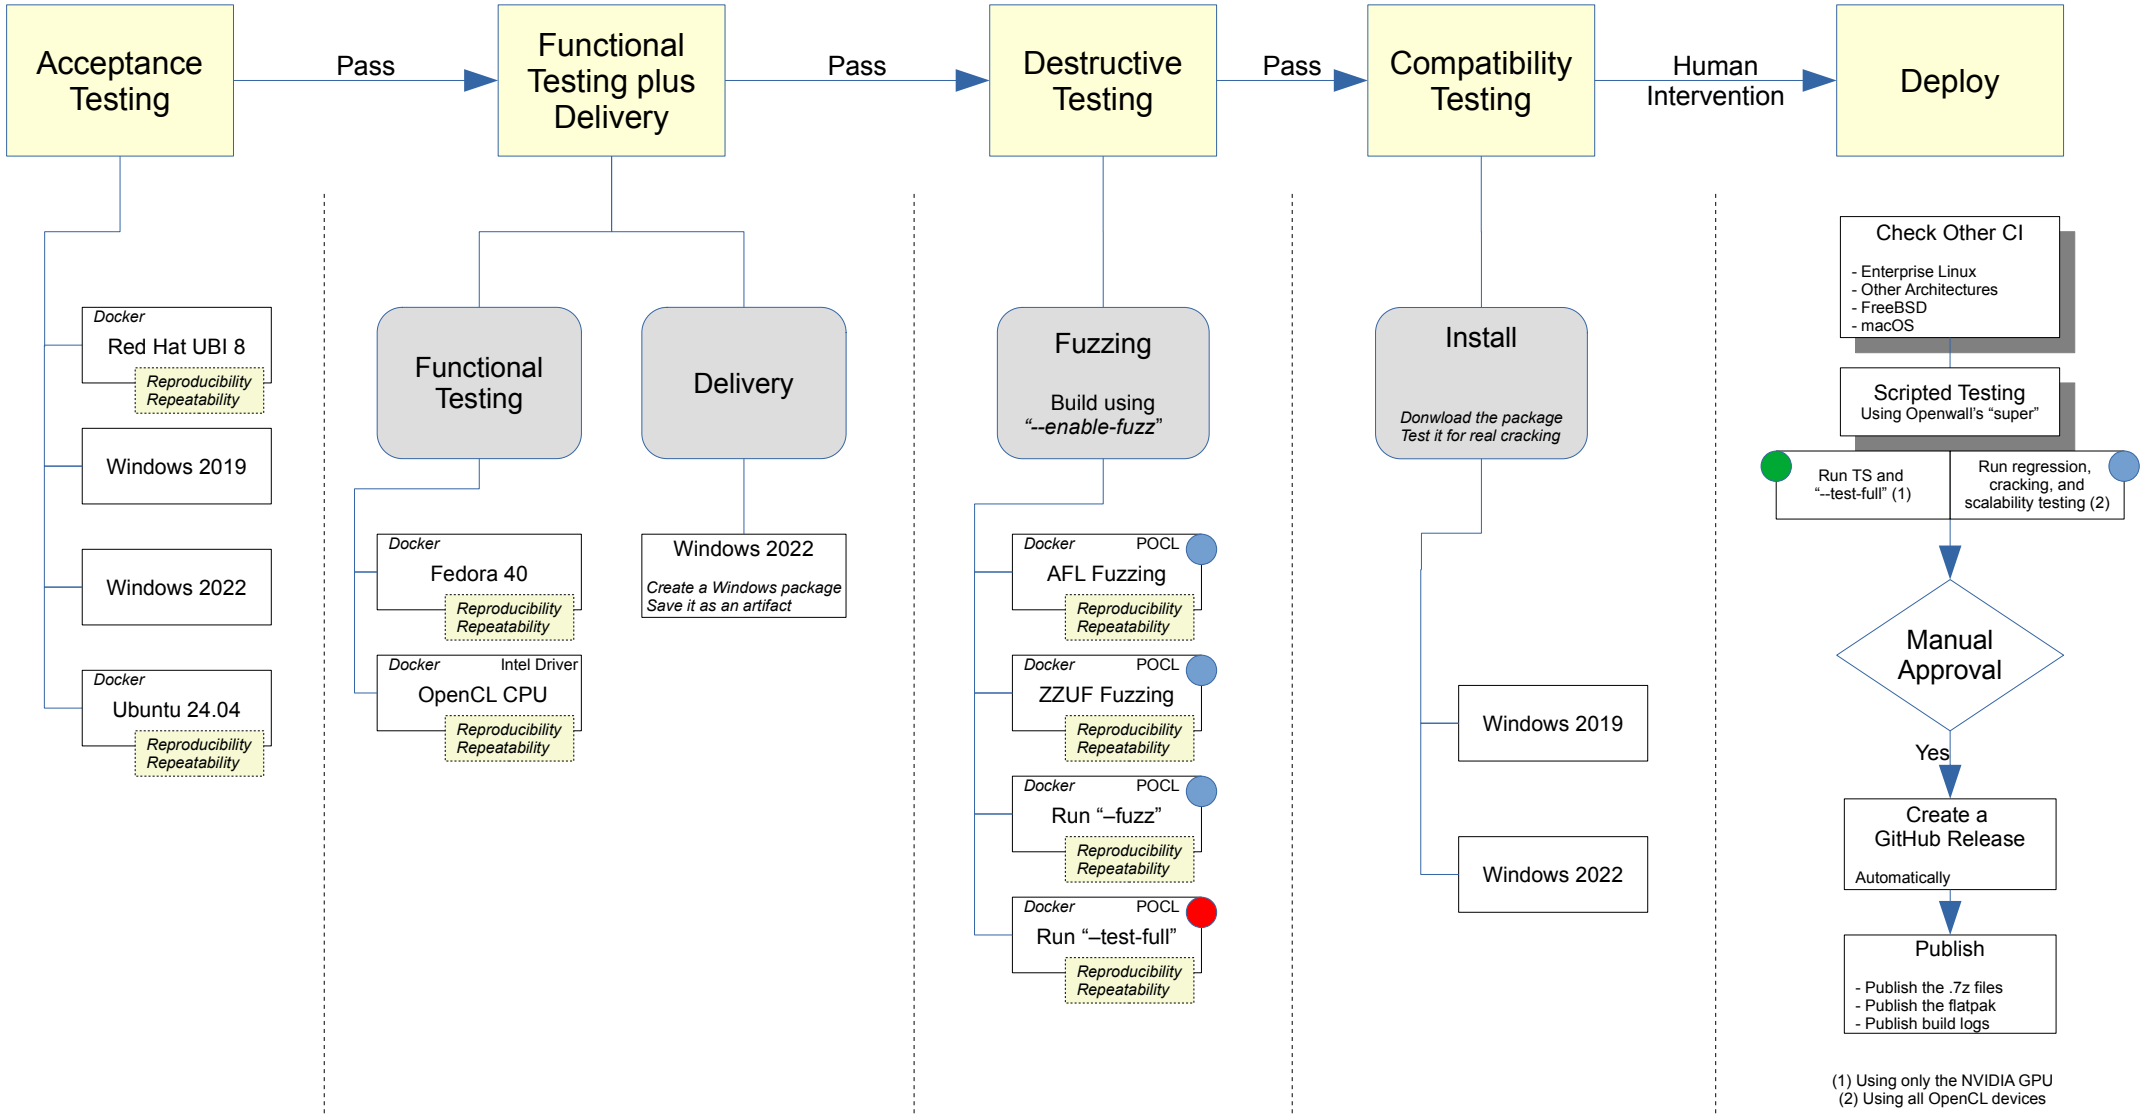
Automated Build and Release Pipeline on Azure DevOps



(1) Using only the NVIDIA GPU
(2) Using all OpenCL devices

Smoke testing.

We plan to add GPU OpenCL tests.

Fuzzing are slow tests.

Download the .7z package file produced by *Delivery* and test it on Azure VMs.

Upload packages, including the one produced by *Delivery*, to a GitHub Release.

NOTE: All jobs inside the same stage run in parallel.

Only "my formats"
